APC Power Management

Power Blackouts, Brown-outs, Spikes!
There will be a next time. Will you be ready?

caliberIT is here to solve your immediate issues, guide you in your recovery efforts and help you to:

- Prevent data loss, downtime and damage to sensitive electronics.
- Prepare for business continuity and recovery.
- Protect your home and business with APC's award winning solutions from desktop to data center.

Whether it is a UPS you need or a complete power and cooling solution for your entire IT environment we can ensure that you choose the correct solution, install it and ensure that it keeps working flawlessly year after year.

caliberIT is currently offering a free Power Assessment of your business systems. The assessment takes approximately 15 minutes so call us for more information or to request the free assessment.

InfraStruXure™

InfraStruXure™ closes the gap between advancements in IT technology and its supporting power and cooling requirements. Paralleling the streamlining of IT systems, InfraStruXure™ is power and cooling architecture made up of modular, highly manageable, pre-engineered components, providing a seamless and secure foundation upon which to build your entire IT environment.

InfraStruXure™ fully integrates power, cooling, management, and services within a rack-optimized design. The result? The reliability, affordability, and predictability of standardized solutions, yet completely customized for your specific problems.

caliberIT provides professional design-to-online services for InfraStruXure™ solutions. Contact caliberIT for more information.
